

RSC 18 and ERSC 18 cordless reciprocating saws

The right saw blade for all applications.

	Description		Blade material	Pitch dia. (mm/TPI)	Total length (mm)	Order no.	Application
WOOD	BASIC For fast wood processing. The reciprocating saw blade for quickly cutting nail-free wood.			5 / 5	305	577486	  
	UNIVERSAL The versatile Universal saw blade. The wear-resistant bi-metal universal blade is suitable for cutting wood with nails in it and is therefore ideal for demolition work.	 		4,3 / 6 4,3 / 7	230 305	577487 577488	     
	METAL STEEL The strong saw blade for metal. The wear-resistant bi-metal saw blade is ideal for cutting metal profiles.	 		1,6 / 16 1,6 / 17	150 230	577489 577490	   
BUILDING MATERIALS	INSULATION Cut insulating materials with ease. The extra-long insulating material saw blade made of HCS tool steel is ideally suited to cutting a wide variety of insulating materials and cardboard.			5 / 5	400	577491	     
	ABRASIVE The dry mortarless construction saw blade. The extremely durable carbide saw blade ensures maximum service life in fibre cement, gypsum fibre materials and other abrasive materials.			4,2 / 6	150	577492	   
DEMOLITION	Professional for demolition. The extremely durable carbide saw blade in a reinforced design for extreme use in dismantling and demolition work.	  		3,4 / 7 3,4 / 7 3,4 / 7	150 230 305	577493 577494 577495	       
MIX PACK	Well equipped for processing wood and metal.					577496	

No more hot fingers – contactless saw blade replacement

The saw blade is automatically ejected when the chuck is opened, so it can be replaced contactlessly. The saw blade can immediately be changed quickly and easily, without any risk from the sharp edges.
